

1ST HOME FOR U

“Let us create a stress-free transition to social stability.”

Transitional living, a cost-effective and supportive shared living house that offers a safe haven and an excellent resource to individuals looking to transition into their new home. Our shared living house is designed to provide affordable and comfortable accommodation to those who need a temporary place to stay. At the same time, we can help navigate the process of finding a permanent residence. We aim to create a supportive and inclusive community where everyone feels welcome and valued.

Disability and supplemental security claims such as appeals, requests for hearings by judges, reconsideration letters, and dire need letters. We also offer initiatives to self-help options, proper need assessment for legal advocacy, referrals to preferred advocates, assistance in obtaining records, evaluations, and providing claimant statements.

Quality education, social integration, community engagement, job opportunities, and investing in social support systems and mental health services are all critical elements of professional education for social stability. By implementing these measures, we can create a society where individuals can thrive, contribute positively, and maintain social stability.

We offer all services to the LGBTQIA+ community, formerly justice-involved, and anyone that has been impacted by economic disadvantages.

After completing the initial assessment with the Assess-Works© System case management will be able to create an action plan and pursue the maximum utilization of community resources.

Keys in the hands to a new home for you,
“simply the best” supportive services, and all
goals accomplished.
