

Dear Provider,

The **iVY Study** is recruiting participants who are:

- 18 – 29 years old
- Living with HIV
- Speak English
- Have **had a HIV viral load result above 20 copies/mL in the past year** (excluding viral load results in the first 3 months after diagnosis).

for a paid study at the University of California, San Francisco about how we can improve mental health, reduce substance use, and enhance wellness through video counseling and a mobile health app.

Participants can:

- ⇒ Earn anywhere from \$470 to \$530 for participation.
- ⇒ No in-person visits required.
- ⇒ **To find out more and see if they qualify scan the QR code below or follow this link:**
